**For Immediate Release**

## **LXI Consortium Exceeds 3,500 Certified LXI Products**

**Niwot, Colorado (Sept. 30, 2016)** – Today, the [LXI Consortium](#) is proud to announce that it has certified [3,568 LXI products](#) from 41 vendors in 303 different product families.

The conformance program in the consortium is one of the most rigorous among standards organizations in the T&M market. The LXI Standard requires all instruments to pass conformance testing before they can display an LXI logo. Each instrument must also have an IVI driver, most of which can be downloaded from the IVI Foundation [Driver Registry](#) page on the [IVI Foundation web site](#).

The conformance testing is conducted globally either at one of the three LXI Conformance Plug Fests each year, or by one of the four approved LXI test houses. The entire conformance test process for LXI is covered in the brief article, *How to Get a Product LXI Certified in Five Steps*, located on the [LXI Conformance page](#) of the [LXI web site](#).

### **About LXI Consortium, Inc.**

The LXI Consortium, [www.lxistandard.org](http://www.lxistandard.org), is a standard-setting organization in the Test & Measurement industry that develops, maintains and promotes the open LXI Standard.

With more than 50 of the top test & measurement (T&M) companies sponsoring and developing this technology, and more than 3568 products in over 303 different product families, LXI (LAN eXtensions for Instrumentation) is the current and future standard for T&M.

LXI has the fastest growth of new products of any T&M standard in the history of the test industry.
